

The only wasted voice
is the silent one

**Do you want to replace our recently Beautification
Committee Awarded, traffic calming, parking increasing,
and neighborhood bonding Powhatan Street
improvements with a rail line powered by overhead
wires?**

Or give up part of Powhatan Park?

It could happen without your input

The Virginia Department of Rail and Public Transportation will be discussing different transportation modes including light rail and bus rapid transit to service Potomac Yards and Crystal City. The meeting will be held

Tuesday, October 30, 2001, 7:00 PM
Mount Vernon Elementary School
2601 Commonwealth Avenue

They are discussing different routes that could include US 1, Columbus and Powhatan Street along with various vehicle options (buses/trains).

While improved mass transit is a very good thing, some options could result in things that are not good for us. Such as loss of parking, reduction of park space and reintroduction of overhead power lines (which we just had placed underground).

Now is the time to act, so our concerns can be considered by this committee as the project moves forward.

Sketch of possible alignment
option under consideration
by decision-makers.

Please adjust you calendars so you can attend this meeting.
